

The Vault Key

The Challenge: Find the correct code to the vault within a specified time limit while stopping the opposition team from completing the mission first.

How it works: By winning mini missions through the day each team can earn clues for the proper code to open the vault key. In the final mission teams use the clues earned to be the first team to open the vault key.

The Benefit:

Strategic Planning - Teams develop a strategy to accomplish the missions.

Communication- Communicate enemy positions

Coordinate cover fire.

Solutions in changing environment - Participants must adapt strategy to overcome obstacles presented by opposing team.

Critical thinking - Use critical thinking to obtain the key code using clues.
